

2021 Census

2021 Census is now closed

Census Day 2021 was 21 March 2021.

The census operation is now over and data collected is being assembled by the Office for National Statistics (ONS) in order to create the database from which anonymised output statistics will be drawn. See below for further information about 2021 Census outputs.

General information about the 2021 Census:

2021 Census Outputs

Plans for the statistical outputs from the 2021 Census are still be formulated by ONS, though they have pledged that the first summary outputs will be published no later than Spring 2022 and that the subsequent detailed outputs should all be published by Spring 2023. It is likely that there will be a summary set of tables for each area, but there are plans for an online query tool that is intended to deliver ad hoc requests for data for various geographies and topics.

Further Assistance
