# Population and Households Summary

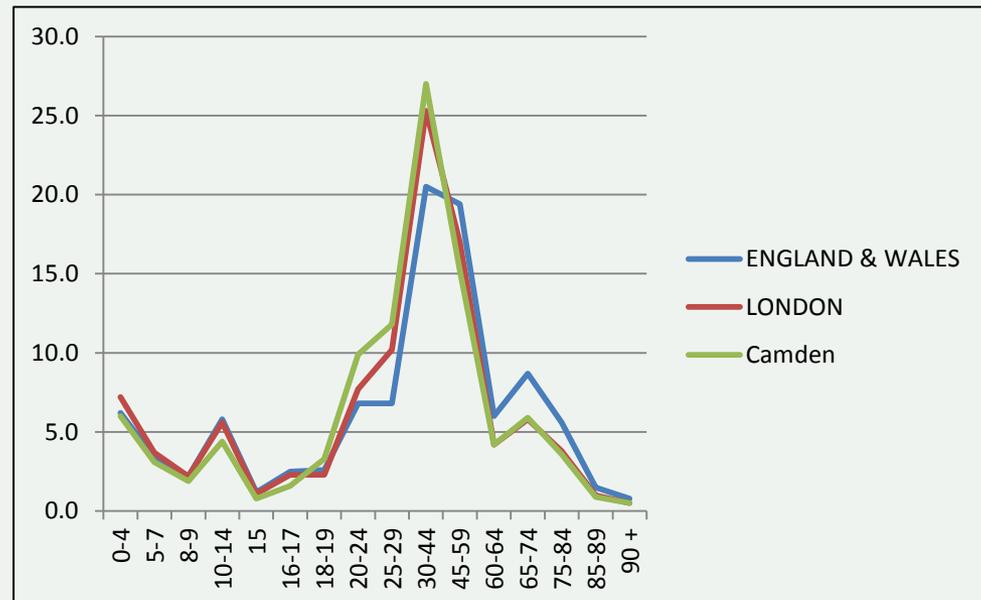

- **Usual resident** population estimated at **220,338** (the 2001 Census found 198,020 people but was later found to have underestimated the population making direct comparison difficult).
- **Most people** (96.4%) **live in households**, but **3.6% of people live in communal establishments** such as care/nursing homes or student halls of residence. This is the highest proportion in London and 23<sup>rd</sup> nationally. (compared to 95.3% living in households in 2001, 4.7% in communal establishments).
- **Overall sex ratio** in Camden is **1.04** females to each male (compared to 1.08 in 2001).
- **Population density** of Camden is **101 persons per hectare** (compared to 91 in 2001).
- The best comparison for the usual resident population is to compare the ONS mid-2001 and mid-2011 estimates. The mid-year estimates show that Camden has grown by 8.6% between 2001 and 2011 (increasing by 17,500 from 202,600 to 220,100).

# Age Structure

## Key Findings

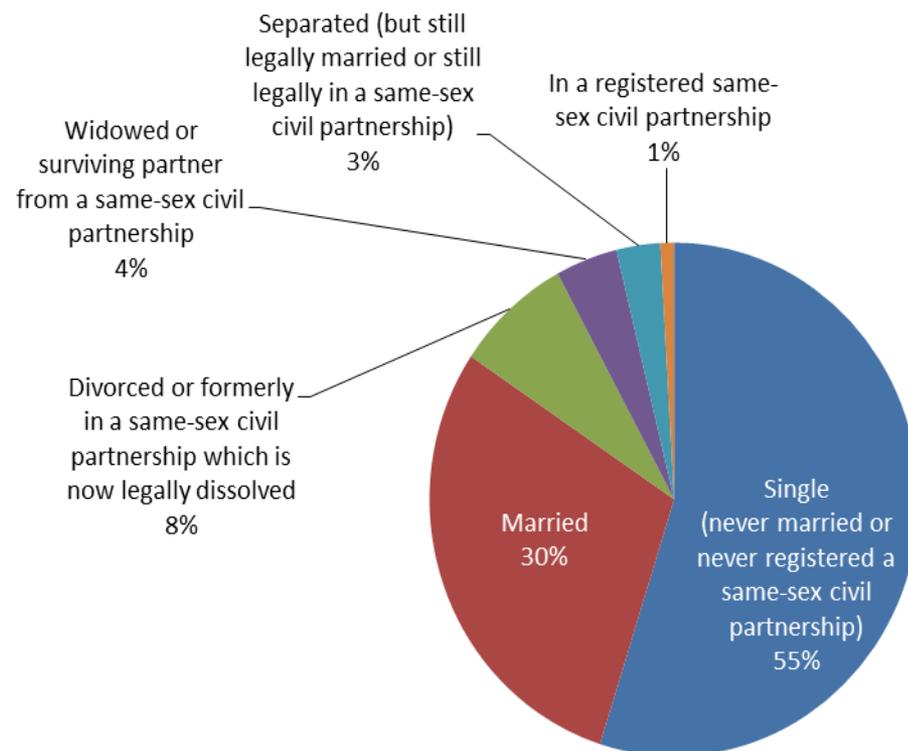

- Camden's usual resident population was 220,338 with the highest proportion of 27% residents located in the 30-44 age band, higher than Greater London 25.3% and England & Wales 20.5%.
- Camden has a higher proportion of residents than Greater London and England & Wales between ages 18-44.
- England & Wales has a higher proportion of the population in the older age ranges from 60 years plus than Camden and Greater London.
- Camden's proportion of population is lower than Greater London and England & Wales between 0-17 years.
- Camden's population is closest in size to Inner London neighbouring Borough's of Westminster (219,396) and Islington (206,125).
- The percentage breakdown in Camden across the various age bands has stayed fairly similar to 2001 except in the age 18-19 band which has increased from 2.7% in 2001 to 3.3% in 2011 and 20-24 from 9.5% to 9.9%. The age band 25-29 has reduced from 13.1% to 11.8%.
- The proportions may be similar however we have seen greater demand for school places across primary and secondary ages across Camden.

	Age Persons	
	No	%
Camden	220,338	100
0-4	13,168	6.0
5-7	6,781	3.1
8-9	4,117	1.9
10-14	9,594	4.4
15	1,805	0.8
16-17	3,540	1.6
18-19	7,178	3.3
20-24	21,863	9.9
25-29	25,923	11.8
30-44	59,573	27.0
45-59	33,564	15.2
60-64	9,255	4.2
65-74	12,937	5.9
75-84	7,897	3.6
85-89	2,048	0.9
90 +	1,095	0.5

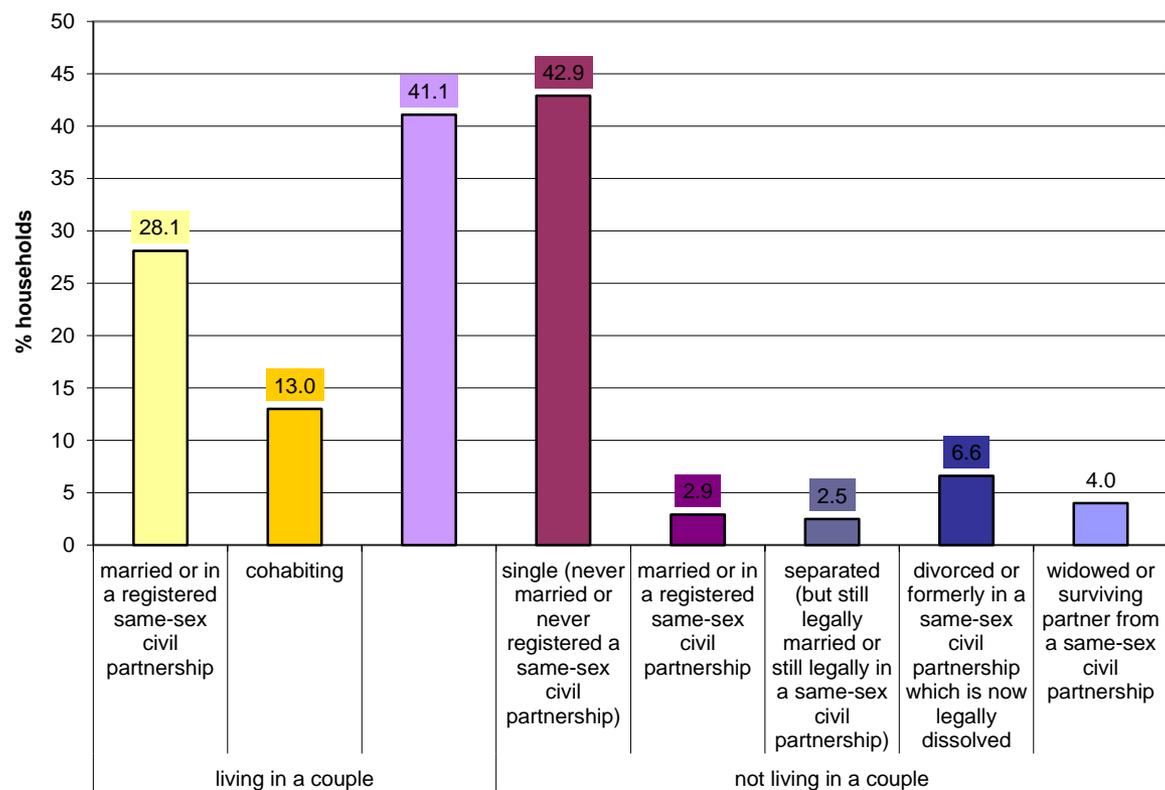

# Marital and Civil Partnership Status

- The **majority of people aged 16+** in Camden (55%) are **single** (never married or in a Civil Partnership). This is the 6<sup>th</sup> highest proportion in London and in England & Wales. (similar to 2001 when the proportion was 54%).
- Camden has the **6<sup>th</sup> lowest proportion of married people** (30%) in England and Wales (5<sup>th</sup> lowest in London) but...
- **4<sup>th</sup> highest proportion of people in a civil partnership** (1%) in England & Wales (3<sup>rd</sup> highest in London).
- Camden has the **12<sup>th</sup> lowest proportion of widowed** people (4%) in England & Wales and London.
- Direct comparison with 2001 is not possible as 2011 Census figures include civil partnerships while the 2001 Census did not.

# Living arrangements

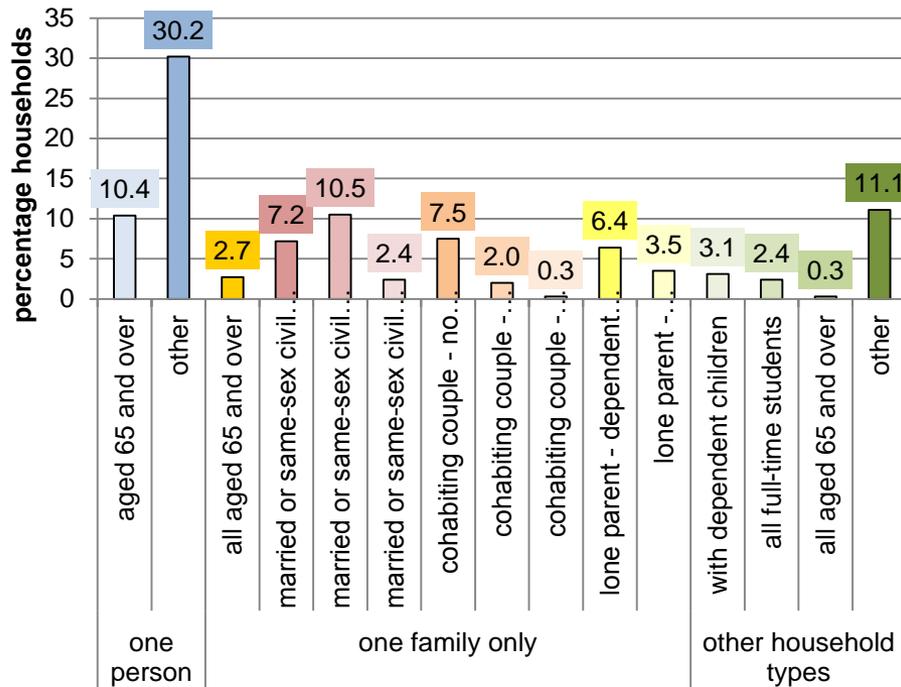

2011 Census: KS10 - Living arrangements of usual Camden residents aged over 16 and living in households

- 41.1% Camden residents aged over 16 live in couples and 58.9% do not.
- Of residents living in couples, just over two thirds (68.7%) are married and just under one third (31.3%) cohabiting.
- Of residents not living in couples, almost three in four (72.8%) are single.
- Camden has the eighth lowest proportion of residents living in couples of all London boroughs and the sixth highest proportion of residents who are single.
- The living arrangements of Camden residents are very similar to those found across Inner London.
- When compared with Outer London and England and Wales, a larger proportion of residents in those areas live in couples (52.9% in Outer London and 57.8% in England and Wales).
- Camden ranks in the bottom of local authorities in England and Wales for the proportion of residents who are married and living in a couple and in the top decile for the proportion of residents who are single.
- Comparison with 2001 data is not straightforward because, since 2001, since same-sex couples have become able to enter a civil partnership. These couples were counted alongside married residents in the 2011 Census.
- However, the overall proportion of Camden residents living in a couple has increased slightly, from 39.6% in 2001 (to 41.1% in 2011) and the proportion who are not has decreased from 60.4% (to 58.9%).
- The distribution of Camden residents who are not living in couple between different households within that group remains similar to that found by the 2001 Census, except for a decrease in the proportion of residents who are divorced (from 7.2 to 6.6%) and widowed (from 5% to 4%).

# Household composition

2011 Census: KS105 - Composition of Camden households

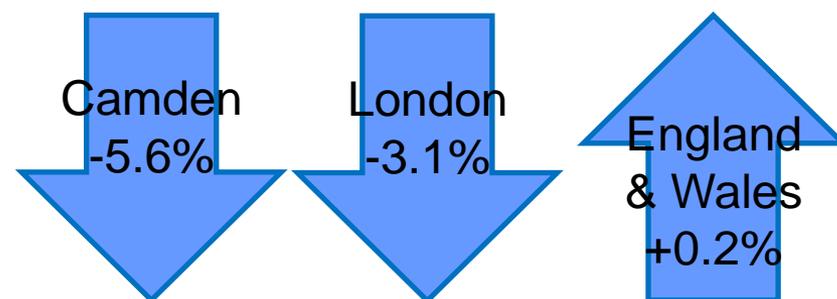

- 40.6% of households in Camden are single person households, 42.5% are made up of one couple or family, and 16.9% are households of other types.
- The proportion of single person households is higher than Inner London (35.9%), Outer London (28.4%) or England and Wales (30.2%) and the fourth highest in the England and Wales. The proportion of single person households in Camden has decreased from 46.1% in 2001 to 40.6% in 2011.
- 25.6% of single person households comprise an individual aged 65 or over. This is higher than Inner London, lower than Outer London and England and Wales.
- 22% of all Camden's households contain dependent children, compared with Inner London's 22.6%, Outer London 33.9%, England & Wales 29.1%. → See *Adults not in employment and dependent children and persons*
- Camden has the eighth highest proportion of cohabiting couples without children of all local authority areas.
- Of households made up of one couple or family, 44.6% (18.9% of all households) include dependent children, slightly lower than Inner London's 48.9% or Outer London's 49.5%, but higher than 42.8%. A further 14.6% (6.2% of all households) include non-dependent children.
- 64.1% of households that include a couple who are married or in a civil partnership include children (either dependent or non-dependent), compared to 23.5% of households that include a couple who are cohabiting.
- 27.8% of households that include dependent children (including those classified as "other household types") are lone parent households. This is similar to Outer London's 25.4%, but higher than Inner London's 20.4% and England and Wales's 21.8%. The proportion of households which are lone parent households has decreased slightly, from 30.1% in 2001 to 27.8% in 2011. → See *Lone parent households with dependent children*

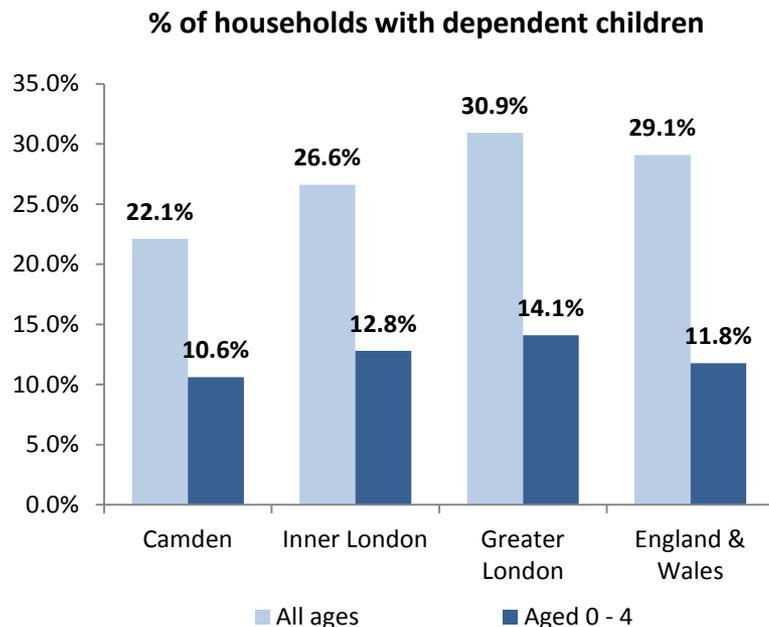

# One person households

	<i>England and Wales</i>	30.2%
348	Hart	22.4%

Change in proportion of one person households 2001-2011 (%age points)

# Households with dependent children and where one person has a long-term health problem or disability

## Households with dependent children

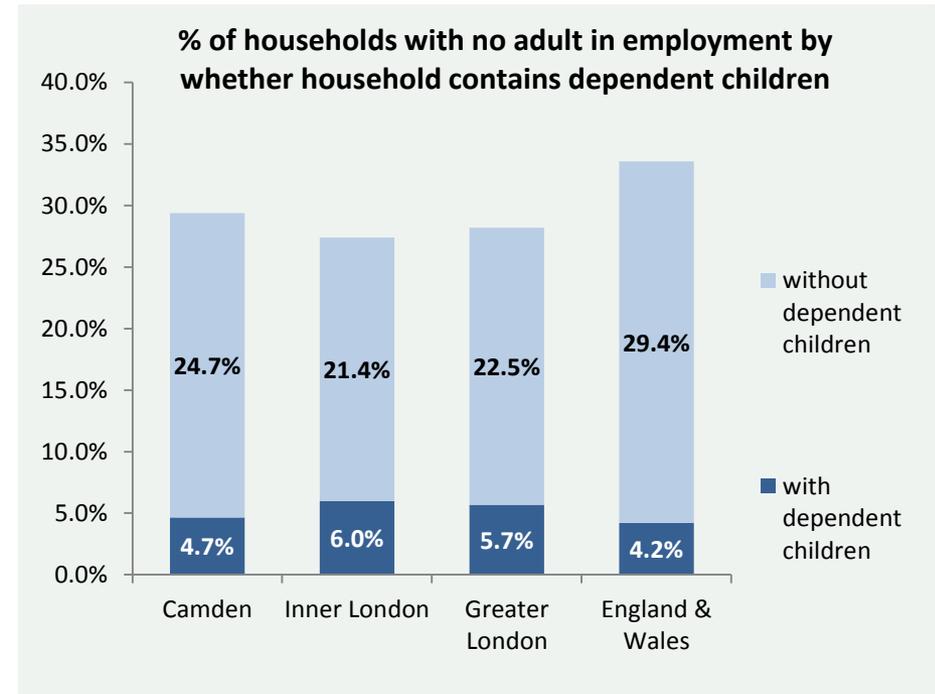

- 21,562 households (22.1%) are households with dependent children, an increase from 2001 (21.6%) but still lower than averages for Inner London, Greater London and England & Wales
- This is shown in the rankings for Camden - 11th in Inner London, 30th in London overall and 341st in England and Wales
- The proportion of households with dependent children aged 0-4 has also risen since 2001 from 9.9% to 10.6%, but this is also lower than London and national averages. Camden is ranked 29th in London and 208th nationally

## Households where one person has a long-term health problem or disability

- 21,795 Camden households (22.3%) contain one or more persons with a long-term health problem or disability, similar to the Inner and Greater London averages.
- The majority of these households in Camden (18.3%) do not contain dependent children which though 7th highest in London is only ranked 284th in England and Wales.
- Due to recording of the long-term illness question used in 2001 data for 2011 is not comparable

# Households with no adult in employment

- 28,654 households are households with no adult in employment
- Percentage of households with no adults in employment has fallen since 2001 from 34.9% to 29.4% following the trend in London and England & Wales generally
- The percentage of households with no adults in employment with dependent children is 4.7%, lower than the averages for Inner London (6%) and Greater London (5.7%) but higher than the England and Wales average (4.2%)
- Camden ranks 22nd in London for households with dependent children and no adult in employment and 91st in England and Wales
- Camden has the 7th highest percentage of households with no adult in employment and no dependent children in Greater London but compared to E&W is ranked 294th

# Lone parent households with dependent children

## Key Findings

- There were 6,228 lone parent households in Camden, of these 400 were male (6.4%) and 5,828 were female (93.6%).
- Lone parents not in employment accounted for 3,193 (51.3%) of the total, of these 174 were male (2.8%) and 3,019 were female (48.5%).
- Compared to other households across England & Wales shows: Lone parent households not in employment in Camden 51.3%, Inner London 50.2%, Greater London 47.8% and across England & Wales 40.6%.
- There is a large gap between female lone parent households not in employment in Camden at 48.5% when compared to England & Wales at 37.4%.
- Looking at ranks: Camden is 5<sup>th</sup> highest in England and Wales for female lone parents
- Comparing Camden lone parent households in 2001 to 2011 shows that the percentage of Male lone parents in part time employment has fallen from 11.3% to 1.3% and in full time employment from 36.9% to 2.4% whereas female lone parents in part time employment have increased from 14.8% to 25.1% and in full time employment fallen from 21.6% to 20.0%.

KS107EW Lone Parent with Dependent Children	Camden	
	No	%

Female lone parent: In full-time employment	1,248	20.0
Female lone parent: Not in employment	3,019	48.5

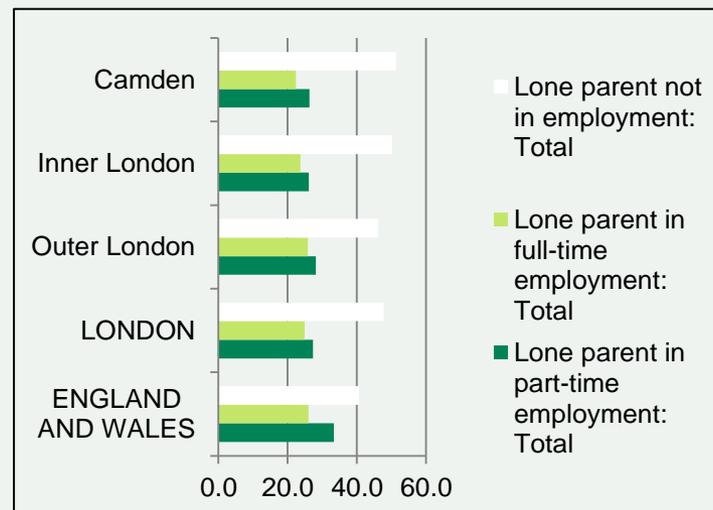

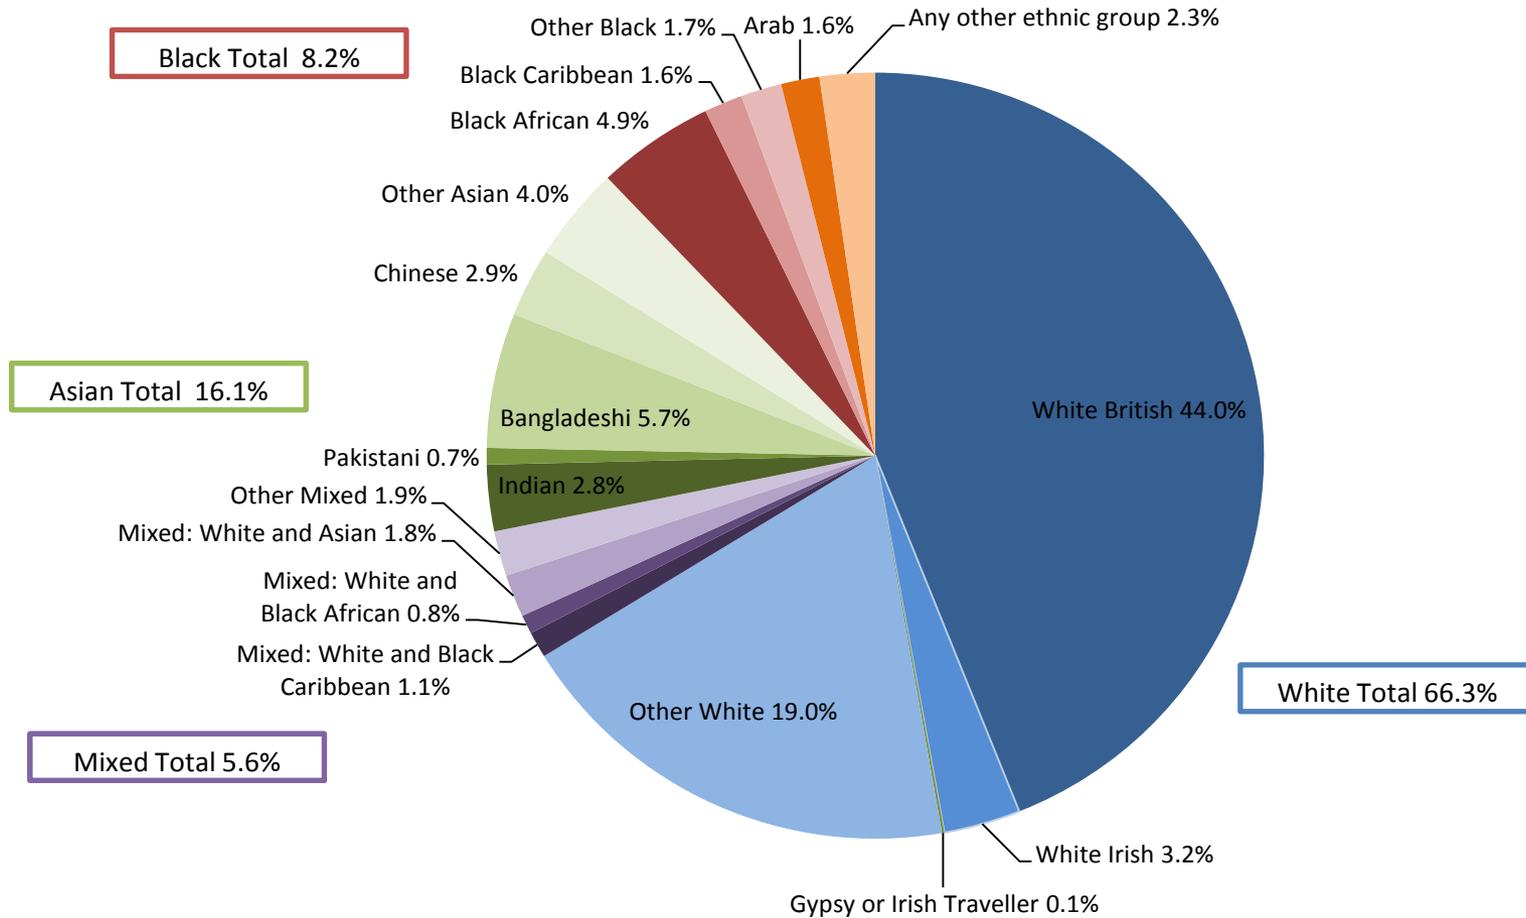

Table KS107EW

# Ethnicity 1

## Top 5 ethnic groups other than White British:

1. White Other (includes European, Turkish, American, Australian, White South African etc) 19.0%
2. Bangladeshi 5.7%
3. All mixed groups 5.6%
4. Black African 4.9%
5. Other Asian (includes Japanese, Korean etc) 4.0%

## Comparisons and rankings

Camden has as a proportion of its population the:

- Fourth largest Bangladeshi population in London (after Tower Hamlets, Newham and Redbridge), sixth largest in England and Wales (after Oldham and Luton)
- Fifth largest White Other population in England and Wales (top 10 all in London)
- Fourth largest Chinese population in England and Wales - 6,493 people or 2.9% of the total, probably mostly students (Cambridge has largest proportion)
- Second largest mixed White/Asian population in England and Wales - small population of 3,880 or 1.8% of total but considerably larger than the Mixed White/Black Caribbean population
- Fourth largest White Irish population in England and Wales (nine of top 10 in London)

## Change since 2001

Comparisons can be problematic for some ethnic groups as the categorisation has changed but there is definitely:

- A decrease in White British population from 52.7% to 44.0%, White British now a minority in the borough
- An increase in White Other population from 15.8% to 19.0%
- Surprisingly the Bangladeshi population has slightly decreased in numbers and as proportion of population – could be due to lack of affordable housing in the borough

# National identity

15 How would you describe your national identity?

➤ Tick all that apply

- English
- Welsh
- Scottish
- Northern Irish
- British
- Other, write in

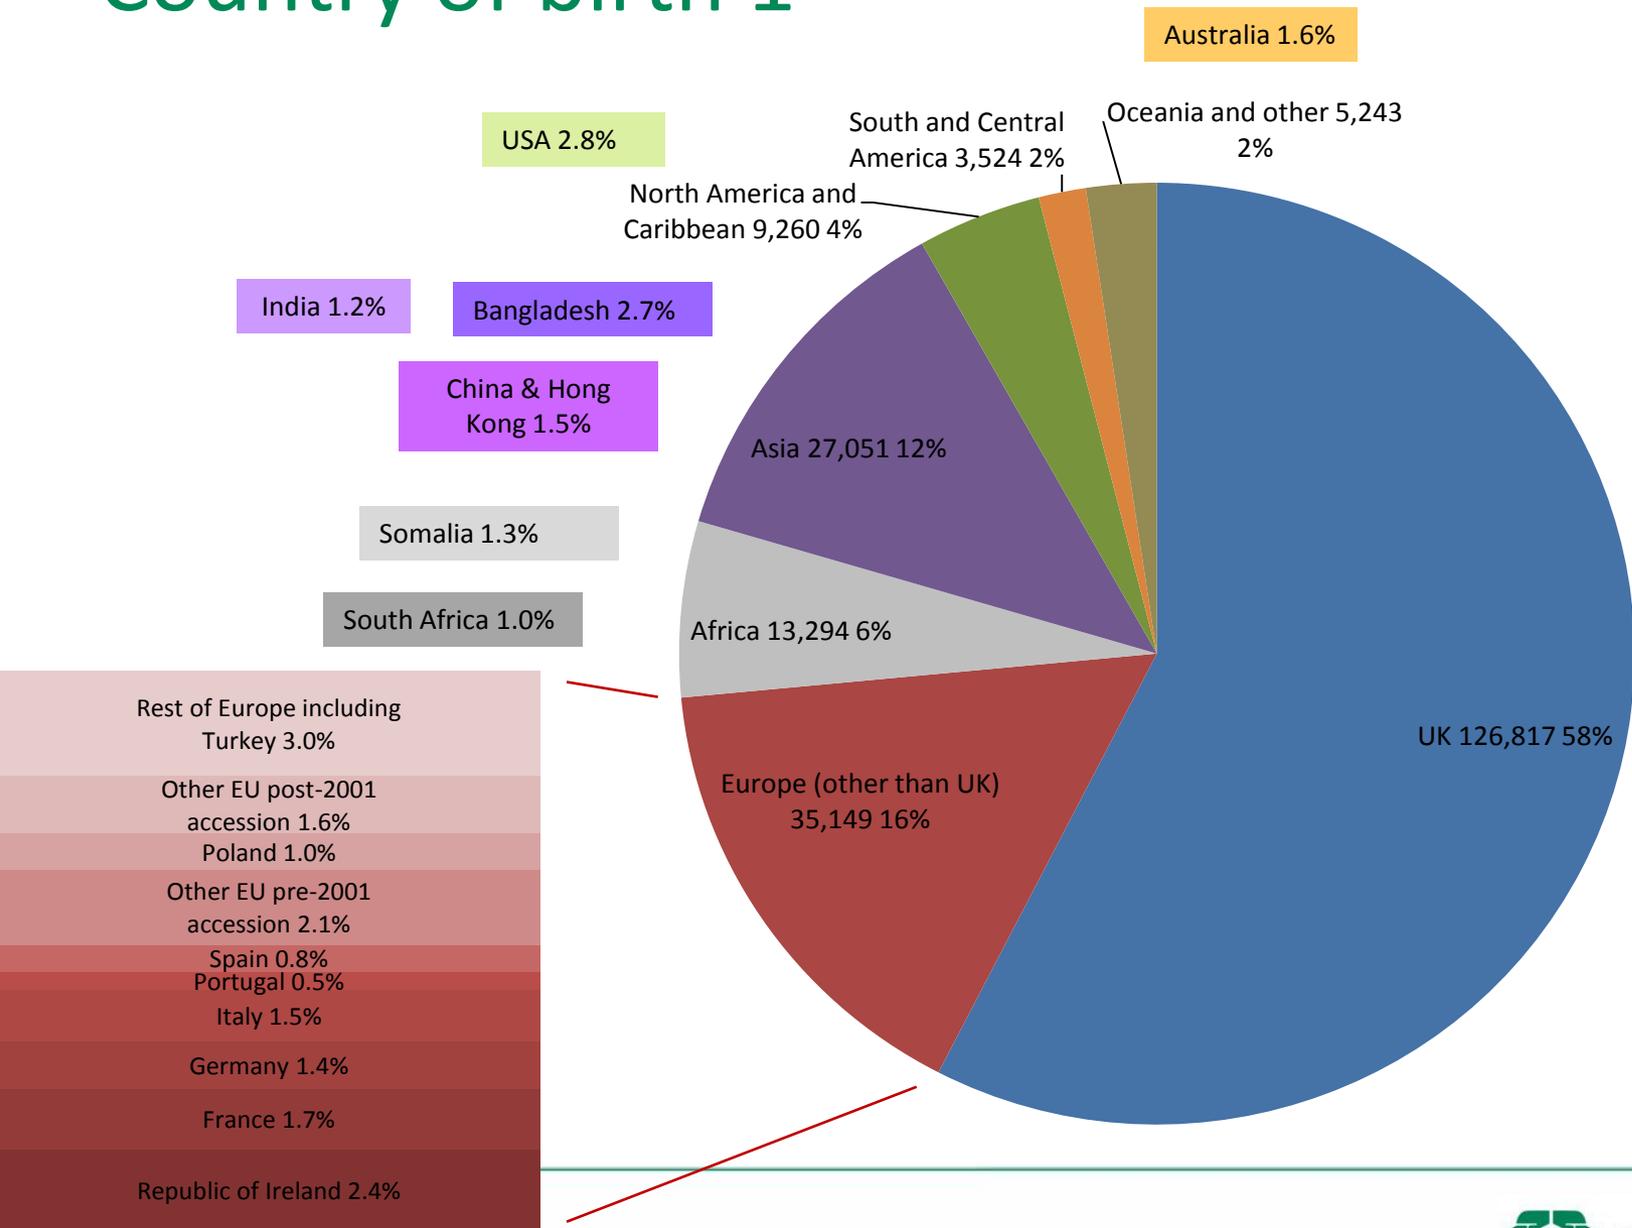

--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--	--

7,614 people (3.5%) ticked other and at least one British identity – 3<sup>rd</sup> highest proportion in E&W

61,640 people (28.0%) ticked other national identity only – 8<sup>th</sup> highest proportion in E&W, top 10 all in London

151,084 people (68.6%) ticked at least one British identity only

# Country of birth 1

All percentages are of total Camden population

# Country of birth 2

## Comparisons

- 42.5% of Camden's population was born outside the UK
- Compared with 36.7% for London and 13.4% for England and Wales
- Camden ranks 11<sup>th</sup> of the London boroughs and in the country as a whole for proportion of the population born abroad

## Change since 2001

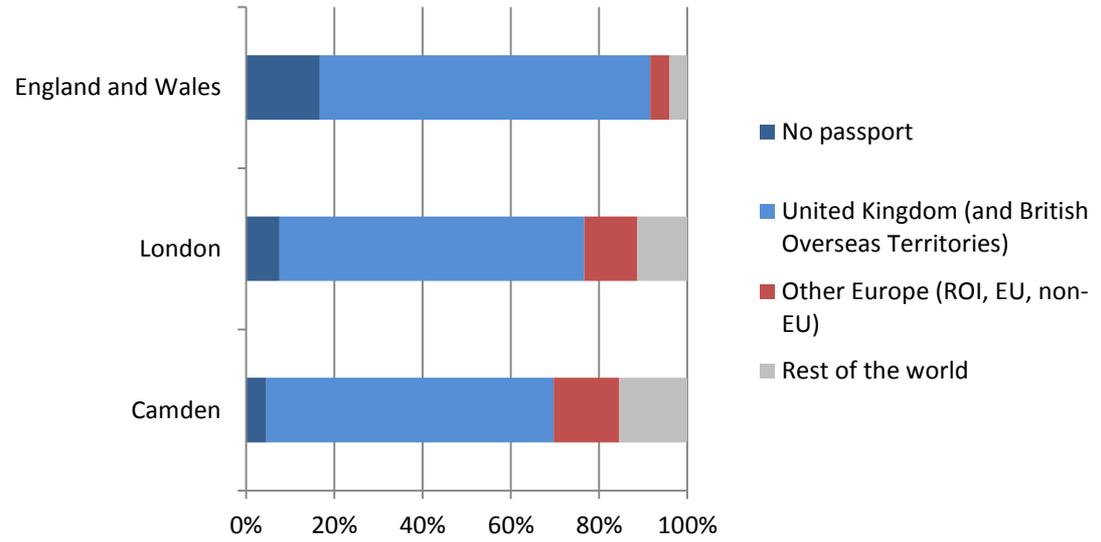

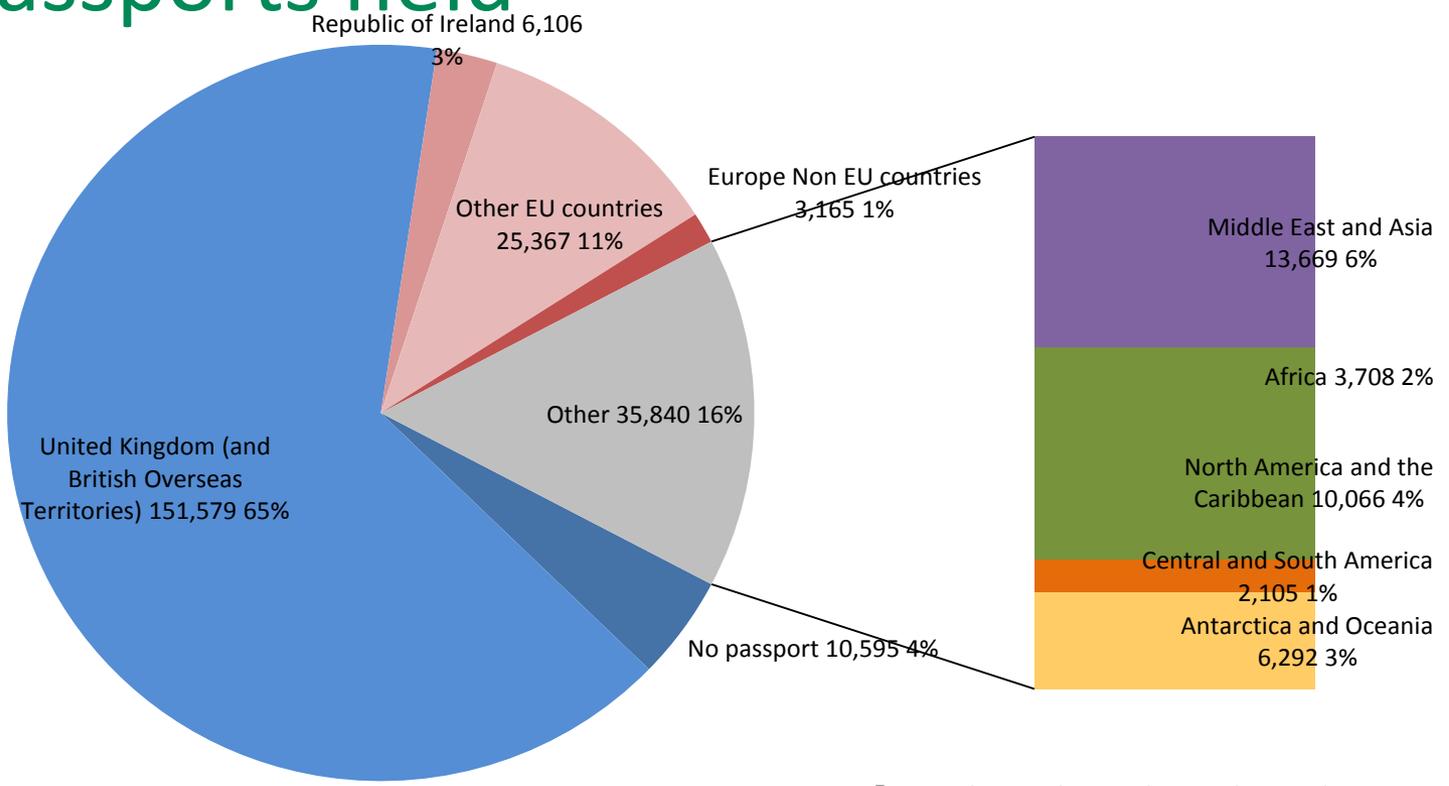

- 36.8% of Camden's population was born abroad in 2001, increasing to 42.5% in 2011, an increase of 5.7%
- The top 5 largest increases in numbers between 2001 and 2011 were:
  1. USA - increase of 1,968 people
  2. France – 1,897
  3. China – 1,506
  4. Poland – 1,433
  5. Italy – 1,231
- Largest decreases – Republic of Ireland (-1,313), Bangladesh (-1,134)

## Rankings

Camden ranks in the top 10 of English and Welsh local authorities for highest proportion of the population born in:

- Republic of Ireland – 4<sup>th</sup>
- EU member states pre-2001 – 5<sup>th</sup>
- France – 5<sup>th</sup>
- Germany – 7<sup>th</sup>
- Italy – 5<sup>th</sup>
- Spain – 6<sup>th</sup>
- Non-EU European countries (excluding Turkey) – 3<sup>rd</sup> (probably due to refugees from Kosovo and other Balkan states and to wealthy Russian residents)
- Somalia – 4<sup>th</sup>
- South Africa – 8<sup>th</sup>
- Iran – 6<sup>th</sup>
- Middle East – 4<sup>th</sup>
- Hong Kong – 5<sup>th</sup>
- Bangladesh – 5<sup>th</sup>
- South East Asia – 4<sup>th</sup>
- USA – 4<sup>th</sup>
- Central America – 3<sup>rd</sup>
- Australia – 6<sup>th</sup>

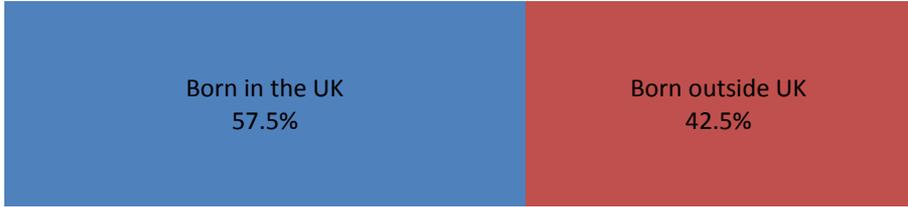

# Passports held

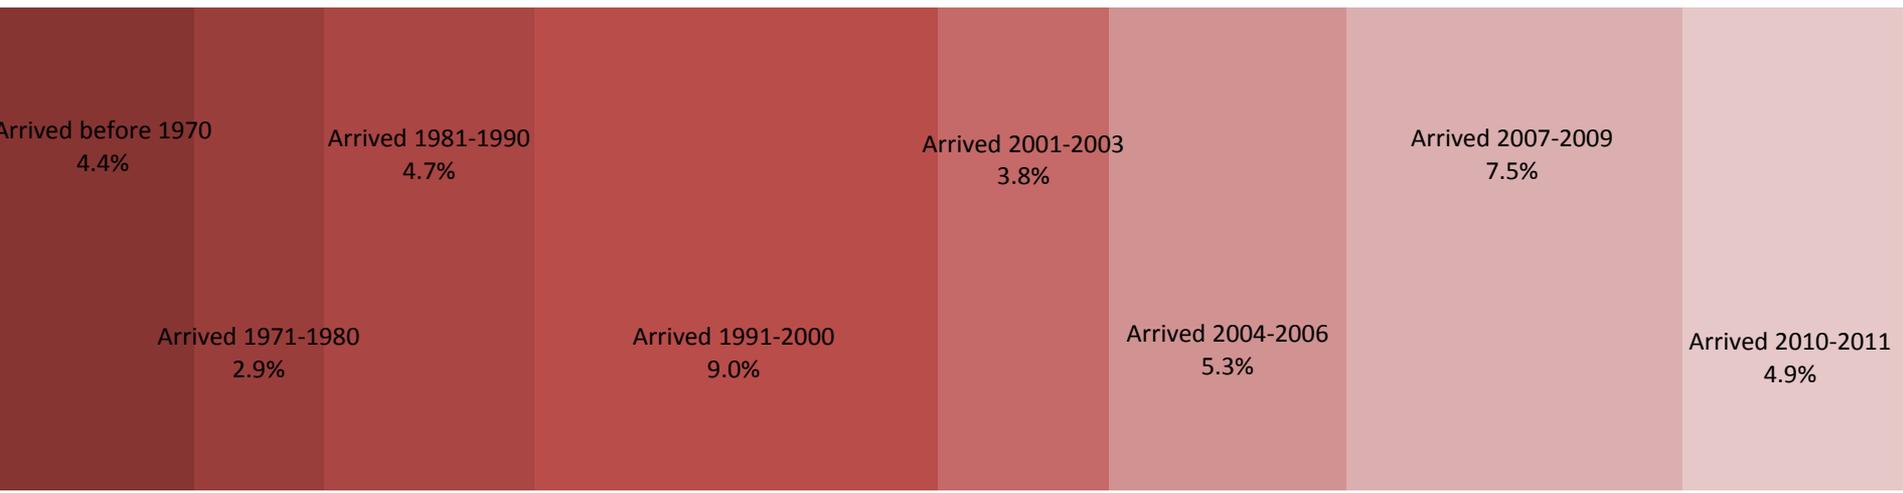

# Multiple ethnic groups

- For the first time, data on **households containing multiple ethnicities** is available.
- It covers single person households, households with different ethnicities across the generations only, households with mixed ethnicity partnerships and households with other combinations of multiple ethnic groups (e.g. shared houses)
- 25,722 households (44.3%) of more than one person contain multiple ethnicities in Camden
- This is the highest proportion in London and in England and Wales
- Camden has 11,336 households containing a mixed ethnicity partnership, 26% of households of more than one person and the third highest in the country after K&C and City of London
- This gives a real flavour of the diversity of the borough – it shows that the borough isn't just made up of discrete ethnic communities that do not mix

# Year of arrival in UK

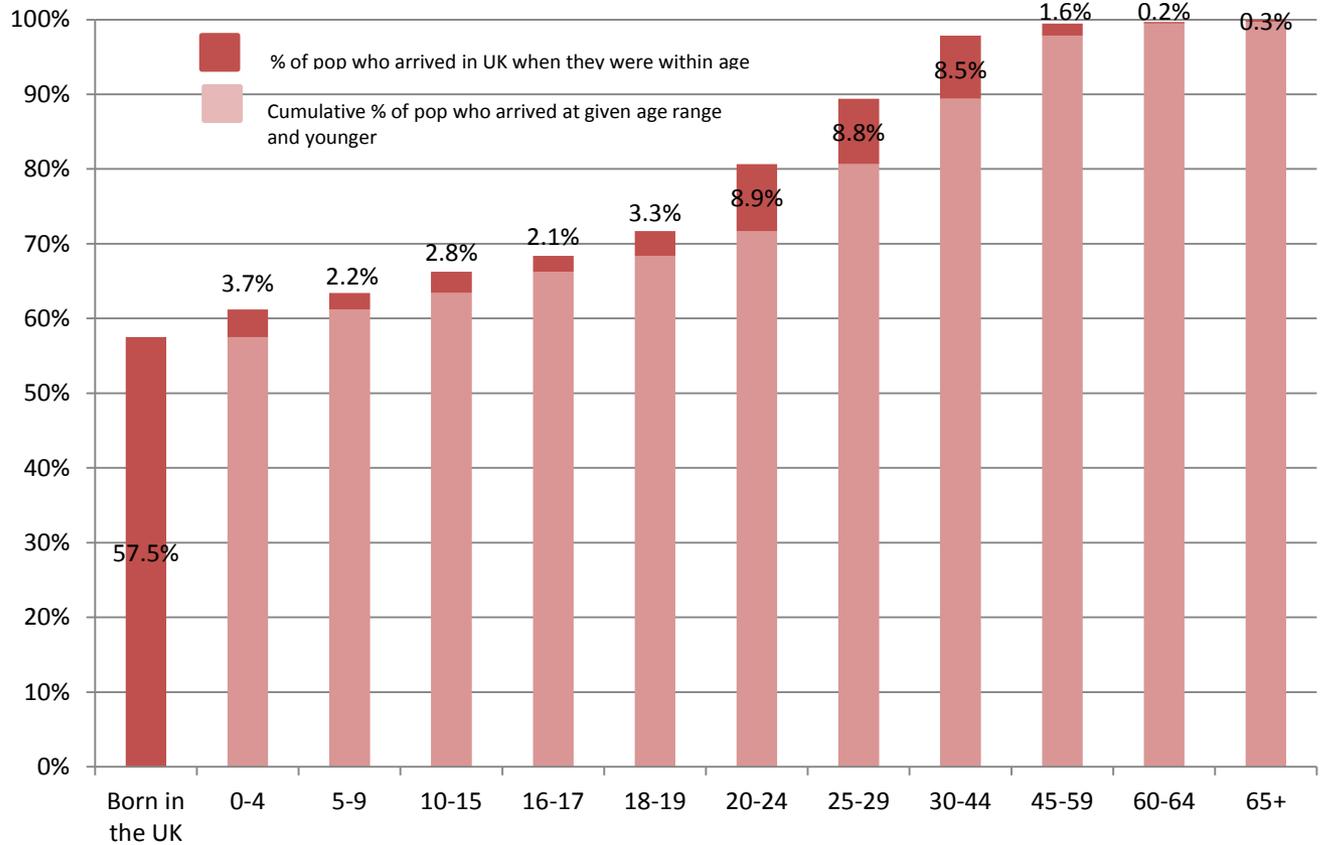

- 17.7% of the population of Camden came to the UK since the last Census in 2001
- Compared with 14.1% for London and 5.4% for England and Wales

# Age on arrival in UK

- 26.2% of the population of Camden arrived in the UK when they were 20-44 years old
- Compared with 7.4% for England & Wales and 22.1% for London

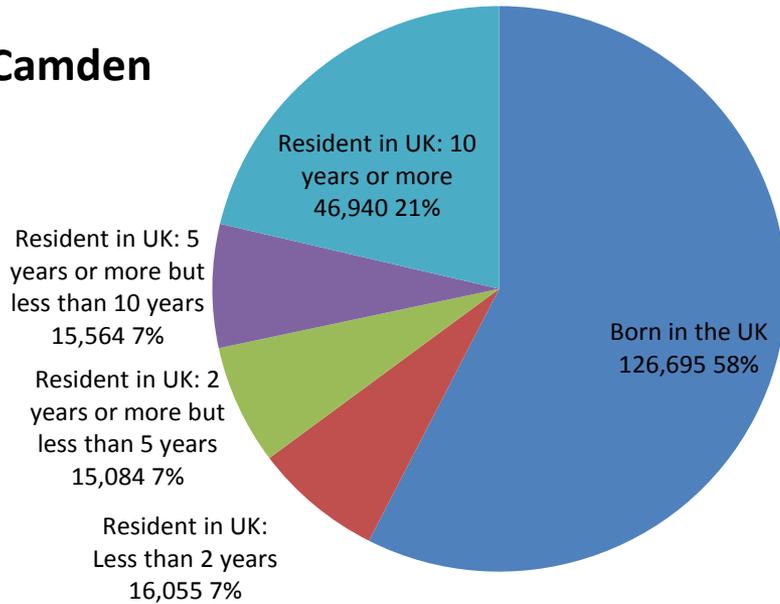

Selected age groups	Camden	London	England & Wales	Camden rank of local authorities

8	Hammersmith and Fulham
9	City of London
10	Oxford

# Household language

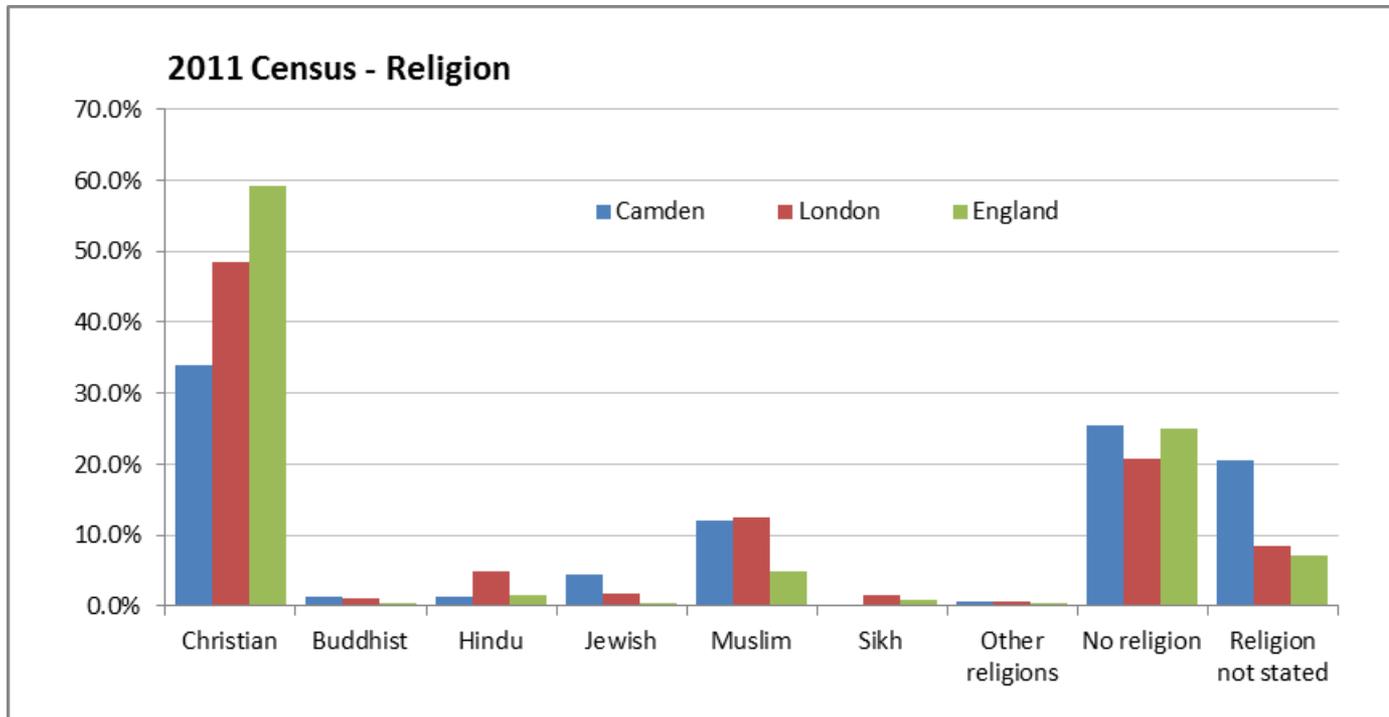

## Key Findings

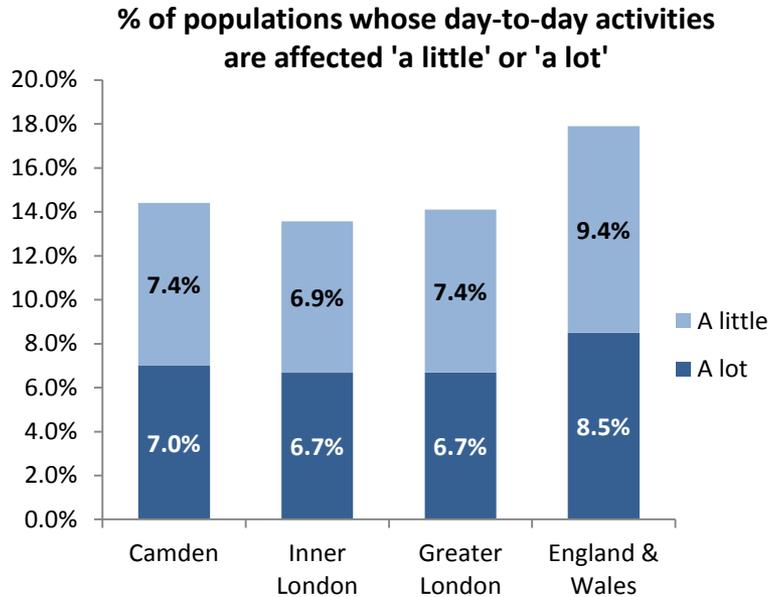

- Out of 97,534 households in Camden:
- 69,420 (71.2%) where all people aged 16 and over have English as a main language. 11,680 (12.0%) where at least one person aged 16 and over has English as a main language. 2,379 (2.4%) where no people aged 16 and over in a household but at least one person aged 3 to 15 has English as a main language. There were 14,055 (14.4%) households where no people have English as a main language.
- Camden compares similarly with other inner London borough's, however the England & Wales percentage of households where English is the main language is much higher than Camden at 91.2% and the percentage of households where no people have English as a main language is lower than in Camden at 4.3%.
- Ranks: Out of 348 Local Authorities Camden ranked 12<sup>th</sup> where at least one but not all people aged 16 and over in household have English as a main language and 15<sup>th</sup> where no people in the household have English as a main language.

KS206EW Household Language	Camden	
	No	%
All categories: English as a household language	97,534	100
All people aged 16 and over in household have English as a main language	69,420	71.2
At least one but not all people aged 16 and over in household have English as a main language	11,680	12.0
No people aged 16 and over in household but at least one person aged 3 to 15 has English as a main language	2,379	2.4
No people in household have English as a main language	14,055	14.4

# Religion

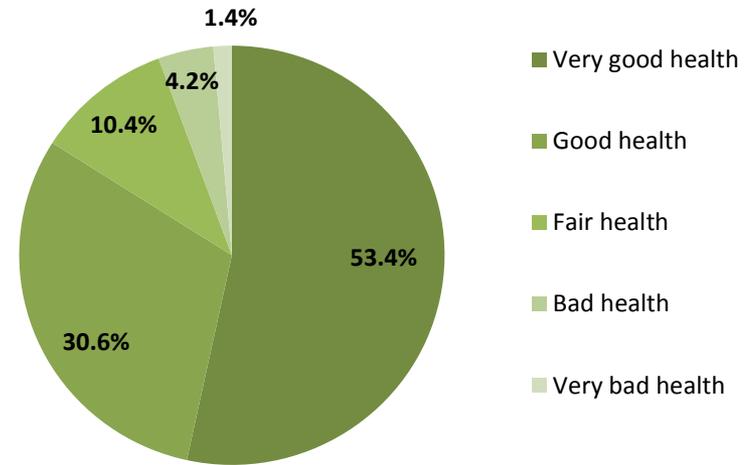

- Christians account for 34% of the population, a reduction from 47.1% in 2001
- 12% are Muslim, 4.5% are Jewish, 1.4% Hindu, 1.3% Buddhist, 0.2% Sikh and 0.6% other religions
- The proportions of Jewish and Muslim people have fallen slightly since 2001, but Camden still ranks 5<sup>th</sup> and 25<sup>th</sup> respectively of 348 local authorities in England and Wales
- Although small, the Buddhist population is 11<sup>th</sup> largest in England and Wales
- More than a quarter of Camden's population (26%) has no religion, compared to 22% in 2001
- 20.5% did not answer the voluntary question, an increase from 10% in 2001

## Day to day activities

- 31,831 Camden residents (14.4%) reported day-to-day activities being affected a little or a lot, higher than the Inner London and greater London averages but below the England and Wales trend
- Camden ranks 12th out of 14 Inner London boroughs regards the % of the population whose day-to-day activities are not limited. Camden ranks 60th in England and Wales
- New question for 2011 replacing the Yes/No question on whether people had a limiting long term illness or disability so comparison with 2001 not appropriate

## General health in Camden: people whose health was... (self-rated)

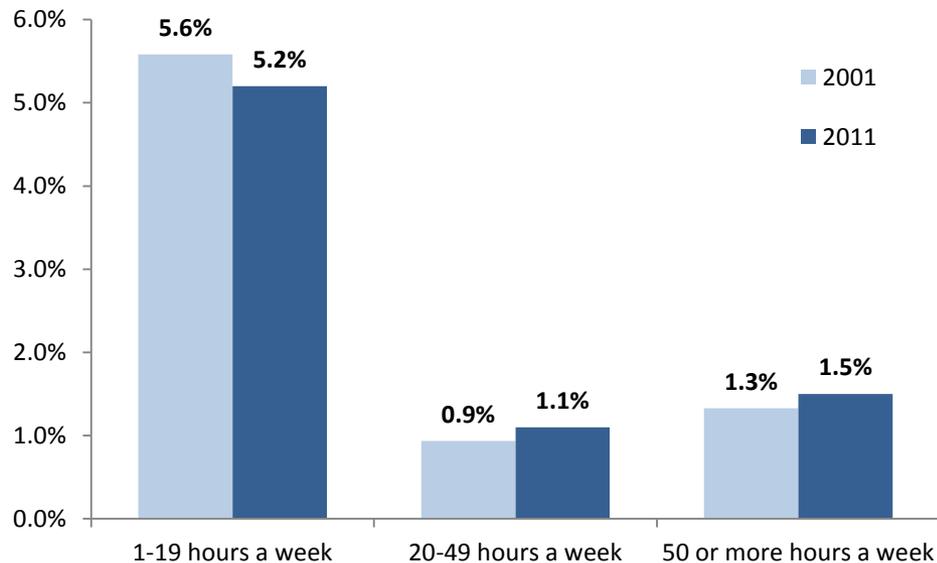

## General health

- The majority of people in Camden reported their general health as 'very good' (53.4%), higher than London and national averages and which placed Camden as 8th highest in London and 19th in England and Wales
- This equates to 12,349 residents reporting bad health or worse.
- Despite high proportions of very good health Camden has above London average rates of 'bad' (4.2%) or 'very bad' (1.4%) health though it mirrors the England and Wales profile
- Of people reporting their general health as 'very bad' Camden is ranked 7th highest in London and 83rd in England and Wales
- General health question changed and expanded to 5 categories so comparison with 2001 not appropriate

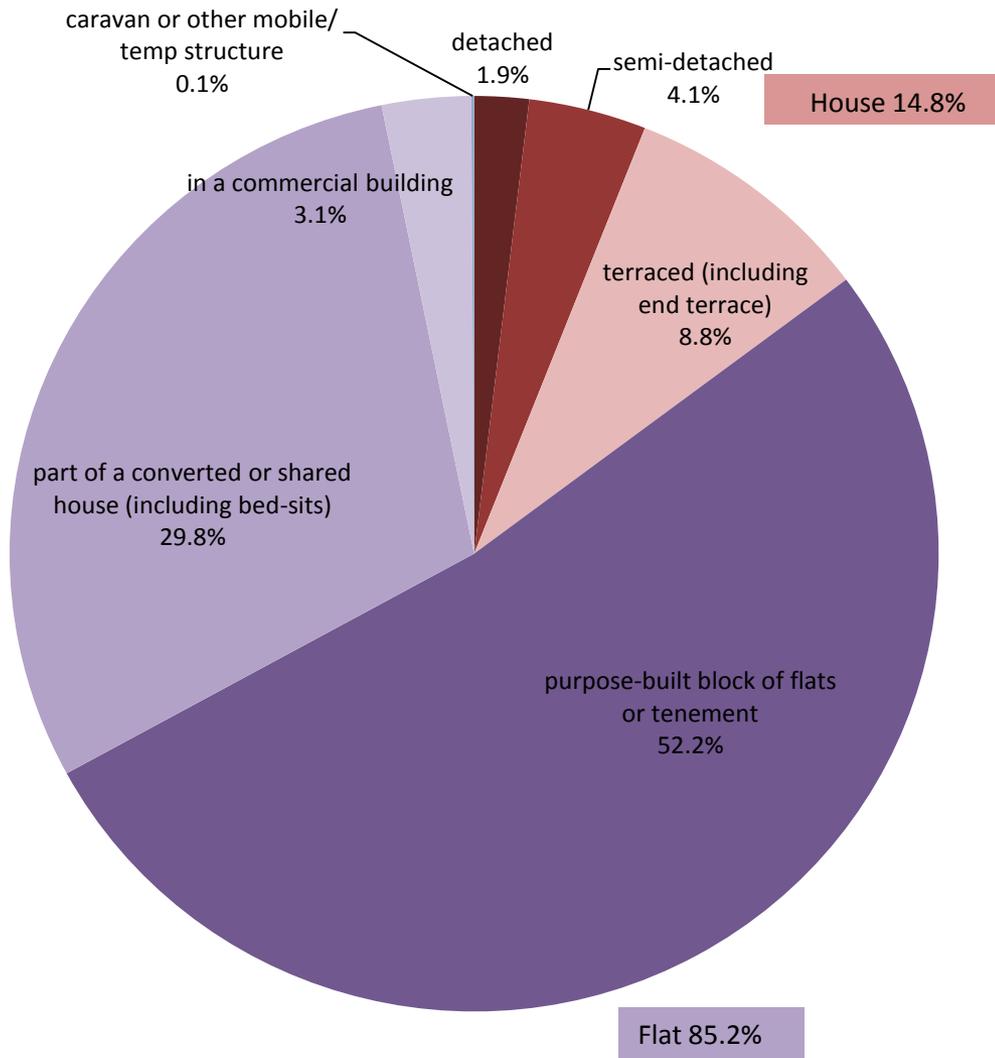

# Unpaid care

**% of Camden's population providing unpaid care by number of hours per week (2001-2011)**

- 17,306 residents (7.9% of the Camden's population) provide at least 1 hour of unpaid care per week. This % is similar to 2001 (7.8%)
- The proportion of the population providing 20+ hours of care per week has increased from 2.3% to 2.6%

# Accommodation type

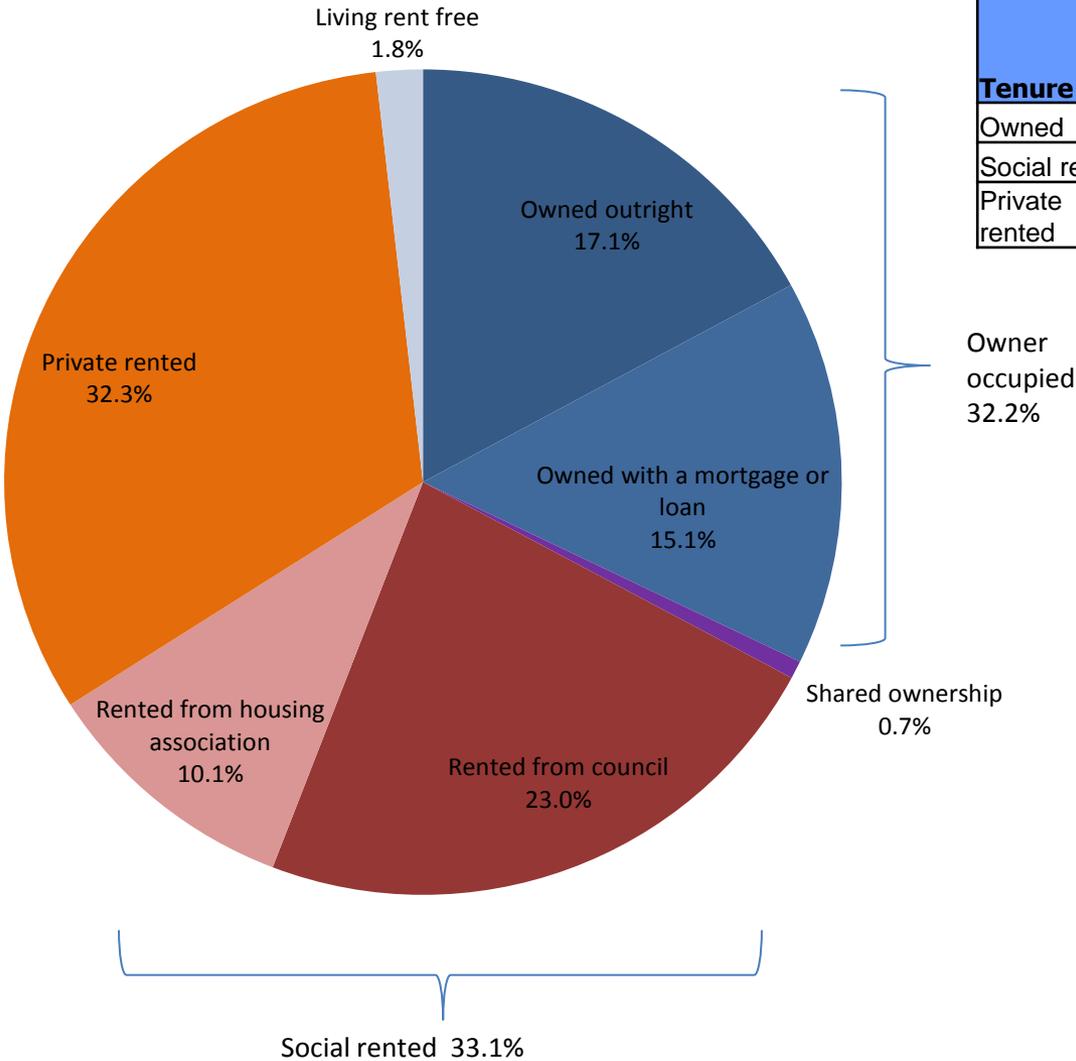

## Proportion of households who live in flats:

- Camden 85.2%
- Inner London 73.1%
- Outer London 36.8%
- England and Wales 21.6%

## Camden rank of 348 local authorities:

- purpose-built block of flats or tenement 4<sup>th</sup>
- part of a converted or shared house (including bed-sits) 1<sup>st</sup>
- in a commercial building 4<sup>th</sup>

# Tenure

Tenure	Camden	Inner London	Outer London	England and Wales	Camden change 2001-2011 %age points
Owned	32.9	35.0	60.0	64.3	-2.0%
Social rented	33.1	32.8	17.9	17.6	-4.3%
Private rented	32.3	30.8	21.1	16.7	4.6%

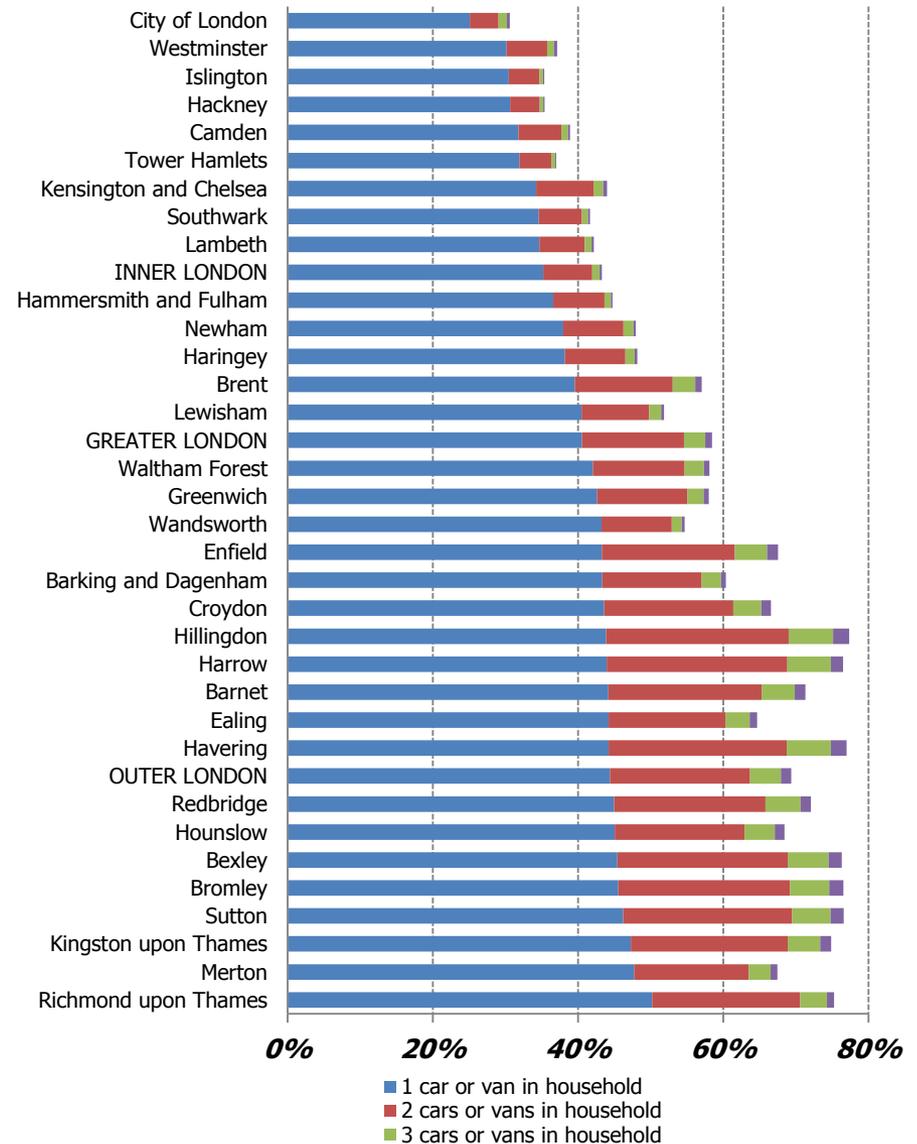

**Camden rank of 348 local authorities (selected tenures)**

- Owned outright 337th
- Owned with mortgage or loan 345th
- Rented from council 9th
- Rented from private landlord or letting agency 6th

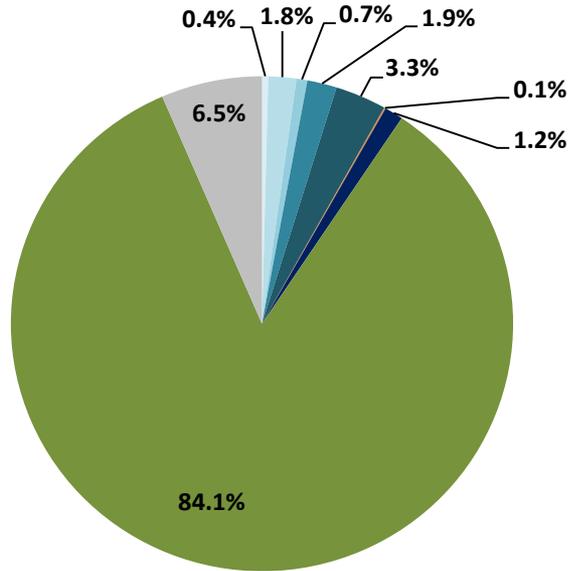

# Car and van availability

- 61% of households in Camden do not have access to a car or van. This is the 6<sup>th</sup> lowest proportion in England & Wales and in London and compares with 42% overall for London. (compared to Camden in 2001 when 55.6% of households had no access to a car/van)
- 32% of Camden households had access to a single car or van, compared to a London average of 41%. (down from 36.1% in 2001)
- 7% of Camden households had access to 2 or more cars.
- In total, it's estimated that there are 46,601 cars in Camden.

Car and Van Availability (%)

# Communal establishment residents

**Distribution of communal establishment residents (7,895) by type**

- Medical / care: NHS: Mental health hospital/unit (including secure units)
- Medical / care: Local Authority: Care home or other home
- Medical / care: Registered Social Landlord/Housing Association
- Medical / care: Other: Care home with nursing
- Medical / care: Other: Care home without nursing
- Medical / care: Other: Children's home (including secure units)
- Medical / care: Other
- Other establishments
- Establishment not stated

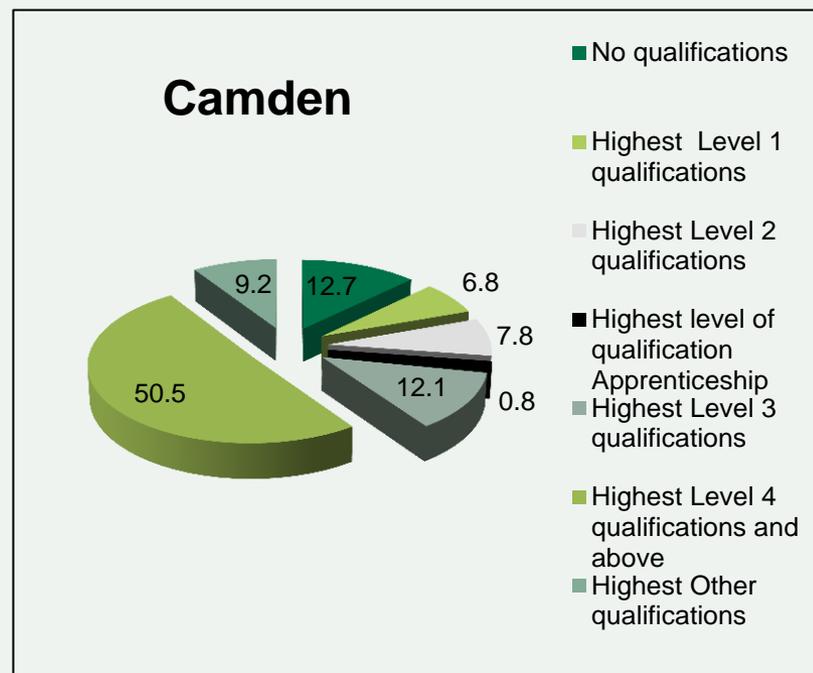

- 3.6% of people live in communal establishments
- Numbers of communal establishments in Camden is 344, lower than 2001 (497 establishments). This bucks the London and E&W trend which has seen an increase
- Camden has 2nd highest number of communal establishments in London (344) behind Westminster
- 7,895 usual residents live in communal establishments in Camden
- 84.1% of people living in communal establishments live in settings described as 'other' - this is higher than the Inner London rate (72.3% and national rate (57%)
- The rank of people in 'other' establishments is 5th in London and 14th in England and Wales
- The percentage of residents in LA care homes is 1.8%, similar to Greater London and E&W averages but lower than Inner London (1.4%)
- The percentage of Camden residents non-LA care homes (nursing or non-nursing) is 5.2% combined, considerably lower than the Inner London (16.7%) and E&W averages 36.3%

# Qualifications & Students

## Key Findings

- Out of 184,873 persons in Camden: 23,451 (12.7%) had no qualifications and 93,453 (50.5%) achieved a level 4 qualification or above.
- The percentage of the population in Camden with no qualification was lower in Camden when compared to Inner London (15.8%), Greater London (17.6%) and across England & Wales (22.7%).
- Camden's population had a high percentage of the population achieving a level 4 qualification or above (50.5%) when compared to Inner London (44.7%), Greater London (37.7%) and England & Wales (27.2%)
- Out of a 348 other Local Authorities Camden was ranked 5<sup>th</sup> with level 4 qualifications or above. 7<sup>th</sup> were full time students and were economically inactive and 11<sup>th</sup> were school children and full time students aged 18 and over.
- The difference between 2001 and 2011 shows that the percentage of people aged 16-74 with no qualification has fallen from 17.4% to 12.7%, and those with level 4 qualifications and above increased from 47% to 50.5%.
