

FREEDOM OF INFORMATION REQUEST FAQs

Commercial Licenses datasets

Due to the large scale of our licensing data we have had to publish this information across four datasets as below, therefore, to help make the process a little more straightforward, you will need to find the premises and reference number in the Applications dataset and then search for other information via the reference number in the other datasets.

The Applications dataset contains the licensing applications and can be used for the other datasets once the licensing reference value has been retrieved. The Documents dataset contains associated forms and information such as conditions, etc., Register holds the Licensing Register and the Activities dataset details the types of activities associated with the licence.

Applications:

<https://opendata.camden.gov.uk/Business-Economy/Camden-Licensing-Applications/uxdm-uum7/data>

Documents:

<https://opendata.camden.gov.uk/Business-Economy/Camden-Licensing-Documents/ajnq-xyia/data>

Register:

<https://opendata.camden.gov.uk/Business-Economy/Camden-Licensing-Register/rv9z-rsui/data>

Activities:

We are looking to make this simpler as soon as we can but because of the Covid 19 pandemic many of the council's services have been affected due to Camden's commitment to keep our families and communities safe and the huge amount of extra work this has created and continues to generate for the council. This has meant that many council officers have moved to different roles and/or taken on added work and responsibility to meet our continued commitment.
